It's actually interesting if you would eliminate from my paper stuff that is directly taken that is cited too properly from the primary source and stuff, I think it would show much different picture. But again it was just so quick that I couldn't. So I had no idea because I've never experienced this process before, I had no idea what to expect. She was very kind enough to send me, you know, everything that addresses plagiarism and stuff and, | 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 | Proceedings happened. What caught me was that I literally looked up the plagiarism definition and it was "intentionally" and "knowingly." And from what I saw in the paper, things other than that one paragraph that I couldn't explain to her and I admitted I couldn't literally have no idea other than that one paragraph, most of it is just because we're talking about the same thing with, you know, the same cases, but if you look at what's usable in those cases it would be the same quotation. So to me it was the hope to be able to eliminate what was obviously just generic. Like the first sentences |
